

Dr. Romanoff – Instructional Design in Special Education – Transcript

Hi, my name is Dr. Brenda Romanoff, and I'm going to be the professor teaching the course called Instructional Design in Special Education, SPED 6503.

The purpose of this course is to provide you students with a unified set of instructional design principles for evaluating and modifying curriculum. This is a synchronous, long distance course. You will be purchasing a headset that you'll be using every week to participate in class. You also will have a Blackboard that will have materials loaded on there for your use during the course.

I'm looking forward to working with all of you in this class and before class I want you to click around the course and get comfortable with the course. And, I'm looking forward to seeing you in the spring.
