

## **Ms. Moore – Praxis Prep Course – Transcript**

Hi, I'm Peggy Moore. Welcome to the Praxis Prep Course. This course is designed to help you pass the two courses that are required for special education students in North Carolina to pass the Praxis: that's test 542 which includes special education content and test 511 which is academic content. This preparation course is a self-guided course where you go at your own pace and you will study the content of both of the courses, and there are many different references for other places for you to go to for additional study if you need more work in various areas. Along the way you'll have the opportunity to take several different sample tests over different areas of the content and eventually take a mock test, and I'll give you feedback on these tests as you get to that point in the course work.

So, I hope that this works for you and send me emails if you have any questions.
