1. Individual Parts Breakdown

- Strainer

  - Main Debris Collection device, easily removable for quick cleaning and clearing.

- Lower Strainer Holder

  - Lower portion of the strainer holder assembly. Contains a funnel shape to effectively funnel water to the lower portion that connects to any standard 1.5” male connection pool hose.

- Upper Strainer Holder

  - Upper portion of the strainer holder assembly. Is connected to the lower through solvent. Has a lip to hold the strainer in place.

- Upper Floater

  - Upper portion of the floater assembly. Is sealed to the lower and 6 are attached, with solvent, to the upper strainer holder subassembly. Responsible for making the pool skimmer float upright.

- Lower Floater

  - Lower portion of the floater assembly. Shares responsibility of floating the pool skimmer with the upper floater.

- Chlorine tablet holder

  - This is the main chlorine dispersal device attached to the outside of the pool skimmer. Features a grated design with a single 3” x 1” opening to accommodate common chlorine tablet sizes.

- Chlorine tablet holder door

  - This is the cover for the insertion point for the chlorine tablets. Designed for quick removal and reattachment.

Assembly and use Instructions

Assembly is quick and easy! The pool hog is designed to be ready to use from the box.

1. Insert the strainer into the pool skimmer from the top, with the opening in the strainer facing out.
2. Make sure the pool hose attached to the vacuum pump is fully submerged and filled with water.
3. Attach male end of the vacuum line to the bottom of the pool skimmer to initiate cleaning.
4. Leave the pool skimmer in your pool until the cleanliness on top of the water is satisfactory.
5. To remove, detach vacuum line and remove from water.

For chlorination

1. Remove chlorine tablet holder door from the chlorine tablet holder.
2. Insert desired amount of chlorine into the chlorine tablet holder through the opening.
3. Reattach chlorine tablet holder door to the chlorine tablet holder.
4. Place pool skimmer in pool to chlorinate water.

General use notice

- This product is safe to be used while there are people in the pool.
- Contains no moving parts and is made from chemical and water-resistant injection molded polypropylene.

Part Maintenance Instructions

Post-use instructions

- After every use, be sure to rinse the pool skimmer with fresh water and store it away from direct sunlight. For storage, strainer and pool skimmer should be stored separately with the pool skimmer being stored upside down.
- Be sure the chlorine tablet holder is completely rinsed and contains no undissolved chlorine tablets.

Warranty Information

Pool hog warrants that the main product sold is free from material defects and will conform to applicable specifications and performs in accordance with the product documentation for a period of 1 year from the date of receipt. Pool hog does not warrant the lifetime of the replaceable parts, and the warranty does not cover said replaceable parts.

The limited warranty is for replacement of the product. Warranty does not cover shipping costs. Warranty void if product breaks due to improper storage, or improper use.
