Assembly

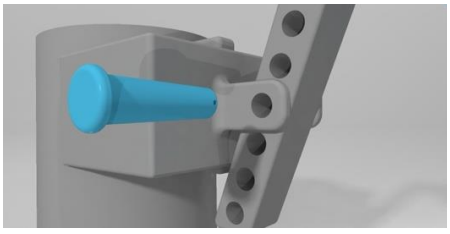

The assembly for the pool skimmer takes just 1 minute! After unpacking the skimmer, simply take the clamp piece and screw and clamp it on the side of the pool.

Our goal is to make sure the skimmer is ready to use right out of the package. With an easy assembly, this is easily achievable!

1. Unscrew the clamp from the mount and clamp onto your pool.
2. Start to screw the clamp tighter to hold the mount in one place on the side of your pool

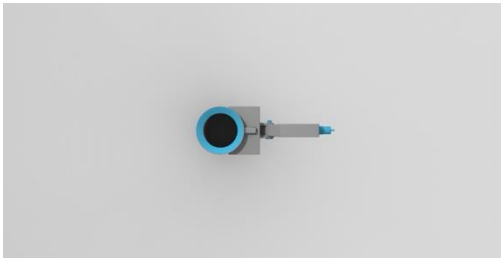

3. Depending on the level of the water, adjust the basket holder by screwing it into the right hole on the mount.

4. Clip the basket onto the basket holder to secure the basket in place.

5. Insert the filter for the chlorine into the bottom of the inside basket and put the chlorine tap inside.

6. Put the filter basket inside the basket and put the filter cap on top after.

How to Use

To insert chlorine tablets:

1. Locate the cap screwed into the top of the tablet holder. (This is located under the skimmer basket).

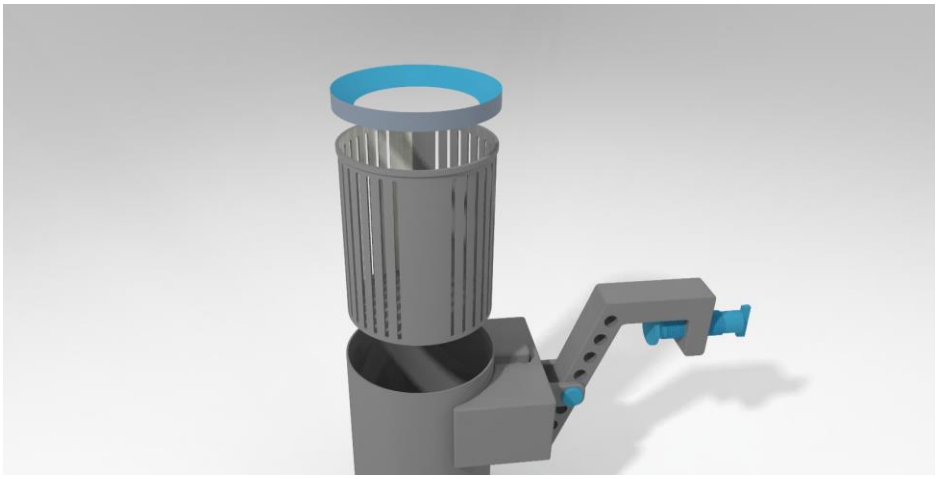

2. Twist the cap counterclockwise until you cannot anymore and pull up to open the tablet holder.
3. Insert chlorine tablets inside.
4. Position the cap so it is aligned with the ridges.
5. Insert into the ridges and twist clockwise to tighten the cap.

To use the skimmer:

1. Ensure the skimmer is properly assembled and secured then place the skimmer an inch or two under the water level.

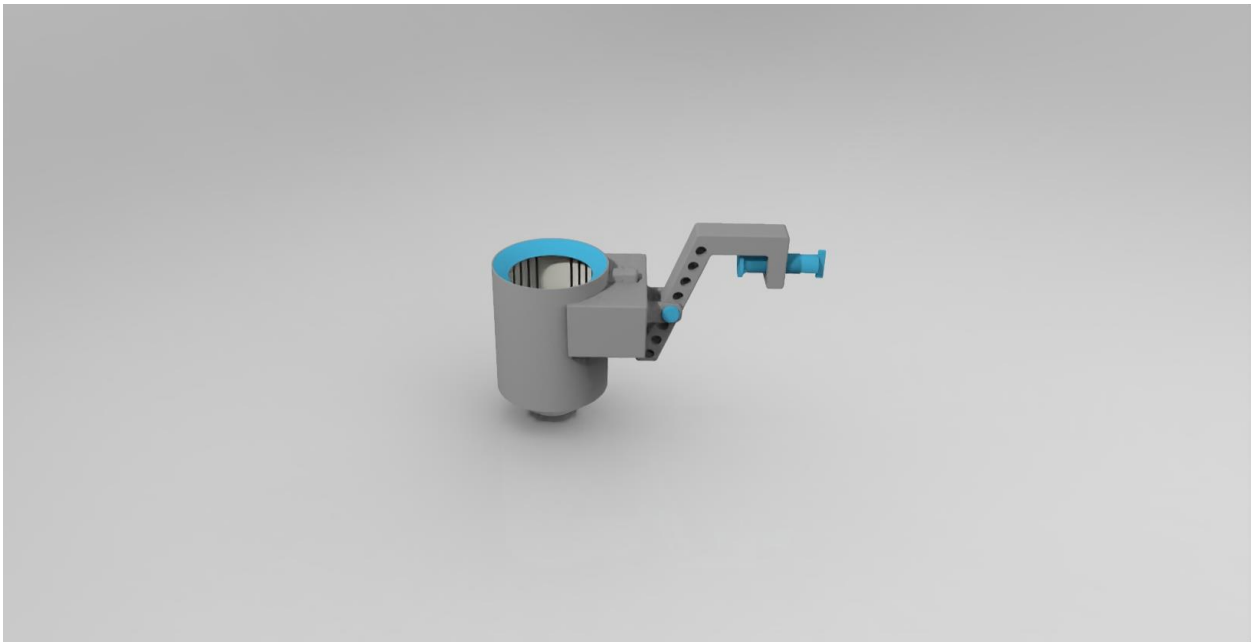

2. Let the skimmer sit all day and overnight to collect debris.
3. When it is full, take off the filter cap and lift out the skimmer.
4. Empty the skimmer and rinse it off to ensure all debris is gone.
5. Put the basket back inside the mount and reattach the filter cap.

Maintenance

The skimmer should be emptied every 24 hours, or as needed, to ensure efficiency. Simply remove the skimmer basket from the mount, remove the debris, and insert it back in.

We recommend that once every month, the skimmer should be cleaned with soap and scrubbed softly to keep efficiency.
