User manual

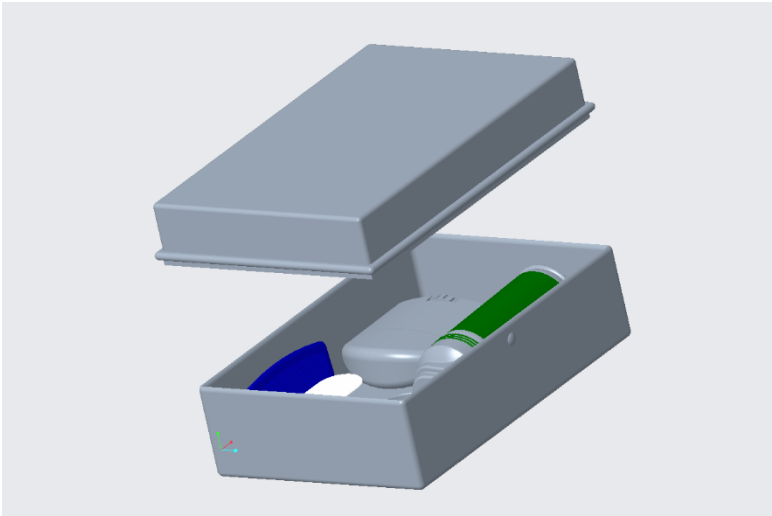

This is a small case meant to hold small bathroom items to care for on long trips. It is a conventional box that is durable and built for long trips. It is a simple design that is easy to carry and easy to fit into a suitcase or any other bags you may be using for your trip.

The Case is a two piece object. The case is held together by 2 indents on the side of the bottom piece and 2 elevated grooved pieces on the inside of the top part. The user will fit their belongings on the bottom piece. They will then slide the top part of the box onto the bottom part until the grooved parts fit together. Additionally the case will come with a built-in stand for any appliances the user would like to rest against it (preferably a toothbrush). There is no assembly required. The tooth brush ring is a built in feature and is ready to use the moment you buy it.

The case is a low maintenance appliance. Because the case is made of injection molded plastic, it is recommended to be cleaned with a disinfecting wipe fairly often or when build up is found inside. It is recommended using a disinfecting wipe on the inside of the box to help prevent your toiletry items from developing a buildup of bacteria. When not in use the case can simply be put away in a pantry or closet.

Warranty Information

Thank you for purchasing our product. Our company offers a 1 year warranty from the date of purchase. This warranty covers flaws/ defects in the material or craftsmanship. This warranty does not cover any damage to the case due accidental damage or negligence from the owner. The warranty also does not wear and tear from regular use.

To file a warranty claim, contact our team in customer service. Make sure to provide proof of the purchase and a brief description of the issue with the product. Our customer service team will review your claim and decide if you qualify for a refund or replacement.
