

## Sample Test 2

Name \_\_\_\_\_

In the real test you will have 10 questions and the following rules:

You have 75 minutes to complete the test below. The usage of books or notes, or communication with other students is not allowed. Ask me if you have questions.

*This is a multiple choice test. You do not have to justify your answer. If, however, you are not sure that your selection is correct, put a star (\*) in front of the question number, and include your calculations on an attached sheet. I will look at an attached calculation only if I see a star in front of the question number.*

*-If you mark an incorrect answer but your calculations contain only minor mistakes, you will get up to 75% credit for the problem.*

*-Beware: if you instruct me to look at a severely incorrect calculation, you will lose at least 50% of the credit, even if by chance you mark the correct answer. (No credit is given for an incorrect answer and totally incorrect calculations.)*

*You get full credit if you mark the correct answer, and mark no star, or if you mark the correct answer, express doubt by marking a star, but I find your calculations perfectly correct.*
