## Assignment 3

## Oral questions

1. $2.4 / 16$
2. $3.2 / 9$

## Questions to be answered in writing

1. Provide an example showing that (SSA) does not set up a congruence of triangles. Define a smaller class of triangles for which (SSA) does imply congruence. (Make a restriction on the angles considered, you do not need to formally prove your statement.)
2. $2.5 / 1$
