

UNCC, Department of Electrical and Computer Engineering
ECGR4101/5101, Fall 2007, Homework #5, Due: 10/3/07, at the beginning of class (20 points)

Four points each:

1. List all of the asm, inc, h, and c files you will need for lab #2.
2. List all of the functions in all of the c files that you will use.
3. Write the algorithm of the main function, identifying all of the called function (only by name).
4. Identify the function you will need to modify.
5. Write the algorithm of the function that flashes the LED, including your changes.
