ECGR4101/5101 - Quiz 14 - 11/24/08

1. What is your name (2 pt): _____

2. True or False: In Lab 6, you needed to "kick start" the receive ISR by manually receiving the first character, then letting the ISR receive the remaining character.

3. True or False: In Lab 6, you need to adjust the voltage between the two Renesas boards since they communicate between each other using RS-232 Serial communications.

4. True or False: In Lab 6, one requirement was that "Processing the queue MUST occur in the ISR."

5. True or False: In Lab 6, one requirement was that "Invalid strings should simply be ignored."
