RESEARCH

Publishing in the field of Embedded Systems and Engineering Education is emphasized by publishing in refereed conferences in order to present the latest findings into the field quickly. Further publication of these conference papers in journals require the addition of 30-50% of new materials. Therefore much more emphasis is placed on conference publications than journals.

Dissertation

STUDENT ADVISING OF RESEARCH

The field of Embedded Systems is one of the very important sub-disciplines of today's electronics industry. Employers seek MSEE and MSCompE graduates in much higher numbers than Ph.D graduates.

Therefore, you will find that our graduate program in this area produces many more graduates with MS degrees.
